

Console Connect by PCCW Global collaborates with Tango Networks to create on-demand access to business mobile communications solutions

HKT (SEHK: 6823) – HONG KONG, December 9, 2021 – Console Connect by PCCW Global and Tango Networks today announced a collaboration to provide on-demand native business mobile communications services through the Console Connect Software Defined Interconnection[®] platform.

The collaboration combines Console Connect's fast, secure and on-demand connectivity with Tango Networks' Mobile-X mobile communications service, enabling businesses to quickly and easily configure and deploy native mobile services from wherever they are located.

The Mobile-X service helps businesses integrate their mobile phones seamlessly into Unified Communications (UC) platforms without the need for any additional software or applications.

Communications resellers, service providers and enterprises can use the Console Connect Software Defined Interconnection[®] platform to create private and direct connections to a UC environment, improving overall network performance and security. The automated Console Connect fabric is underpinned by PCCW Global's private, low latency IP backbone, which is one of the largest MPLS networks in the world.

Tango Networks' Mobile-X service will be directly available to Console Connect users through the platform's new MeetingPlace feature. MeetingPlace enables users to meet, buy and sell within a growing ecosystem of cloud, data center, SaaS, UCaaS, IX and IoT partners, while making on-demand virtual interconnections between apps, services and one another.

Users of the platform can virtually interconnect across the leading AS3491 MPLS network, which offers higher levels of network performance, security and speed.

Console Connect is accessible from more than 650 Console Connect-enabled data centers in over 50 countries worldwide, providing extensive reach across Europe, North America, Asia Pacific, Africa and Latin America. The platform is also directly integrated with all major cloud providers, including AWS, Google Cloud, Microsoft Azure, Oracle Cloud and others.

Mr. Neil Templeton, Vice President, Marketing, Digital Innovation, Console Connect, said, "Today's businesses are increasingly looking for a more integrated and mobile-centric way for their distributed workforce to access the tools that they need. We are pleased to welcome Tango Networks to Console Connect's MeetingPlace, allowing our users to assemble mission-critical mobile communications applications, whilst also improving their overall network performance and security."

cont'd...

The Mobile-X service from Tango Networks turns any mobile phone into a fully featured extension of a company's communications platform. Businesses use Mobile-X to deliver easy-to-use, business quality communications for remote workers and employees working from home, the distributed workforce, deskless employees, workers on the go or in the office. Mobile-X enables users to operate business calling features using their phones' native device interfaces, requiring no special apps or training to utilize top business quality communications no matter where they work. Companies can record and monitor business calls and texts, even if they take place on personal mobile phones.

Mr. Andrew Bale, General Manager, Cloud Services, Tango Networks, said, "Console Connect represents a game-changing approach to IT and communications solution creation for today's businesses. The platform's Software Defined connectivity and MeetingPlace ecosystem are a perfect fit for our Mobile-X service. Now communications service providers and other resellers will be able to create exciting new mobile-enabled services, and enterprises will benefit from finely tailored mobile communications for their distributed workforces."

About Console Connect

Console Connect by PCCW Global is an easy-to-use platform for the Software Defined Interconnection® of businesses, applications and infrastructure. It allows users to self-provision private, high-performance connections between a global ecosystem of enterprise, carrier, cloud, SaaS, IoT, UCaaS, Security-as-a-Service, IX and other Network-as-a-Service partners. Console Connect is the only digital platform that is underpinned by one of the world's largest private MPLS networks and a Tier 1 global IP network that is ranked in the top 10 for IPv4 and IPv6 peering, delivering higher levels of network performance, speed and security to meet the digital needs of today's interconnected businesses.

Accessible from 650+ data centres in 50+ countries worldwide, the platform is integrated with all major hyperscale cloud providers, including AWS, Google Cloud, IBM Cloud, Microsoft Azure and more. Through the Console Connect portal or via API, users can find, purchase and access a broad range of home-grown and third-party software solutions. Visit www.consoleconnect.com for more information.

About Tango Networks

Tango Networks is revolutionizing business communications with the industry's first mobile network built for business, controlled by businesses.

The Mobile-X service turns any mobile phone into a fully featured extension of a company's communications platform, putting mobile voice, text and data entirely in a company's control for the first time.
